League Of Nations Years Old Today

ANIZATION CONCEIVED BY
PRESIDENT WOODROW
WILSON

GENEVA, Jan. 10, (UP) — The League of Nations, conceived by President Woodrow Wilson and organized in the aftermath of the war, observed its 14th birthday today. It was an observance rather than a celebration. Germany and Japan had withdrawn during the war. Its disarmament efforts were deadlocked. On the desk of the league secretary was a report from the committee that its efforts to halt the world's only official war between Bolivia and Paraguay had failed.

Many believed that the league had its last year in its present form. Premier Benito Mussolini of Italy is sponsor of a move to revise the covenant to make it more attractive to nations like the United States, Britain and Germany.

H. S. STUDENTS HEAR INTERESTING TALK

Dr. F. M. Vreeland, professor of sociology and anthropology at DePauw university, gave an interesting and unique talk about the American Indian to the student body of the high school at convocation Tuesday.

Dr. Vreeland pictured a "Century of Progress" exhibition that might have been held by the different groups of American Indians before the white man visited our shores. Our constant digging and collecting and interpreting of Indian artifacts, skulls and customs, lead us to know that their display would have been extremely varied and enlightening to the white man of that time and even more so to the white man of today.

The speaker so contrasted the simple way in which Indian life and culture fitted into the abundant plant and animal life with which he was surrounded to the way in which the white man thinks of all the lower life existing only to satisfy his whims and caprices.

In other words, Indian life in America has a fascinating lure and probably a cultural message not only for us today but also for future generations.

The students thoroughly enjoyed this interesting lecture and will look forward to another installment of Dr. Vreeland's stories on Indian life.

Attempted Jail Delivery Fails

TROUBLE FOLLOWS STRIKE OF
VEGETABLE WORKERS IN
CALIFORNIA

LOS ANGELES, Jan. 10, (UP) — A small army of sheriff's deputies increased their vigilance in the southern California strike area today following an attempted jail delivery at El Centro, center of a strike of 3,000 vegetable workers.

Deputies turned back a mob of 500 Mexican and Filipino workers with tear gas when the strikers stormed the county jail in a mad effort to release 10 men who were held on charges of violating the country anti-picketing ordinance. The delivery plot was frustrated without bloodshed.

At Brawley, 18 miles away, deputies dispersed gatherings of strikers by throwing gas bombs into the crowd.

CANT PAY AGE PENSIONS

BRAZIL, Ind., Jan. 10. — The Clay county board of commissioners at their January meeting discussed the old-age pension law application, but saw no hope of putting the law into effect at this time. The board held that the law could not be put into force at present on account of the condition of county finances and deferred action until a later meeting. The whole question will be taken up later when funds are available. Several hundred persons who might have benefited by the old-age pension provisions have filed applications for such pensions.

NO DECISION REACHED IN MILK STRIKE

FAIL TO AGREE ON FEDERAL
PROPOSAL FOR STRIKE
SETTLEMENT

PICKETING IN FULL SWING

Supply Of Milk In Chicago Rapidly
Dwindles As Result Of Present
Situation

BULLETIN

CHICAGO, Jan. 10, (UP)—All factions participating in the Chicago milk strike were called to confer with Mayor Edward J. Kelly today and were reported to have agreed to end the strike immediately and submit the matter to arbitration.

An official statement was not issued immediately but the mayor's office reported "the strike is over."

CHICAGO, Jan. 10, (UP)—A noisy meeting of delegates of the Pure Milk association, dairymen's cooperative, broke up today in discord over a federal department of agriculture proposal for settlement of the Chicago milk strike.

Failure to reach an agreement under which the federal government could force acceptance by dairy companies of the cooperative's demands blasted all hopes for an immediate settlement of the strike which has almost completely dried up a daily flow of 2,500,000 quarts of milk into the city.

While the 300 delegates wrangled for eight hours during the night, their confederates stopped and searched three trains, threatened and picketed a farm home until the owner used a shotgun to drive them away, and halted scores of private automobiles.

The picketing activities already had brought the power of the state and federal governments in opposition to the strike. Federal injunctions restraining the strikers from interfering with milk shipments to two Chicago dairies were obtained.

State police were ordered to protect all private automobiles from molestation by the strikers. Governor Henry Horner ordered state highway police to put an immediate stop to the halting of private cars.

The injunctions were issued by Judge John P. Barnes, who said that United States marshals would be provided as escorts for the trucks of the Economy Dairy company, if necessary. The Meadowmoor Dairy company was informed it could have its own armed guards deputized as marshals to protect the trucks.

Mayor Edward J. Kelly of Chicago notified milk distributors that they must arrange a truce with the strikers and restore regular milk deliveries. The mayor and the city council planned to provide new territories from which milk could be shipped to Chicago, if the members of the Pure Milk association do not reach an agreement. City ordinances now limit the area from which milk can be shipped into the city to the area dominated by the Pure Milk association.

Council Holds First Meeting Of Year

MATTERS OF LOCAL INTEREST
DISCUSSED BY COUNCIL-
MEN TUESDAY NIGHT

Few matters of importance were brought before the city council at their first meeting of the new year, held at the city hall Tuesday night. City Clerk Fred Shively read an invitation asking the local councilmen to attend the official opening of the new city building at Crawfordsville Wednesday, Jan. 17. Mayor W. L. Denman expressed his intention of attending and it is believed that other local men will also be present.

Plans and specifications which were to have been presented to the council for the nine-block downtown paving project were not yet ready. The work, which is being done by City Engineer Vernon Heath, will be completed within the next week or ten days and will probably be presented at the next meeting of the council.

A new mosquito elimination project for west Olive street was discussed, but no action was taken. Mayor Denman stated that the Berry street project will be finished in about ten days.

Following an investigation it was found that a sufficient amount of cast radiation for the new heating plant at the fire department could not be obtained locally and a committee was appointed to see what it can find in Indianapolis. Approximately 1,220 feet will be needed.

A permit was granted to C. H. Tribby to bury two small oil storage tanks on the rear of the Hays lot on Franklin street.

All claims against the city were allowed. The two largest were \$530.69 for street lights and \$200 to O. A. Ellis for the treasurer's bond.

City Marshal Otto O. Dobbs showed members of the council a new ammunition kit which had recently been added to the equipment of the police department. It consisted of various types of cartridges and a new tear gas gun.

SIX FLYING BOATS READY FOR FLIGHT OVER PACIFIC TO HAWAII

SAN FRANCISCO, Jan. 10, (UP) — Six gray flying boats of the U. S. navy were poised on the placid waters of Paradise Cove today, ready to roar out over the Golden Gate at noon or soon thereafter for the Hawaiian Islands on the longest over-water mass flight ever attempted.

A "flat calm" prevailed on the 2,100-mile stretch "Patrol Squadron 10" expected to cover within 24 hours in order to reach its base at Pearl Harbor, Honolulu, in daylight tomorrow. The weather was considered "ideal."

But a storm was brewing west of Hawaii and threatening to move eastward into the path of the six huge planes as they winged their way across the Pacific.

Accordingly, navy aerologists urged an immediate start on the daring venture which was to navy men just a matter of the routine transfer of the planes to their permanent base.

DEPAUW FROSH BEST
 In a game at Terre Haute Tuesday night the DePauw freshman team defeated Indiana State's frosh by a 30 to 18 count. A final period scoring spree put the Tigers out in front and the State yearlings did not threaten during the final minutes.

Both crews started out on about even terms and featured a defensive type of ball. Neither squad was effective in shooting during this period. At the half time, the teams were tied, 7-all. During the final half, DePauw found the netting and took a commanding lead.

Krehen, Coffin and Osborn carried the burden of DePauw's attack, while Eastabrook and Hoffman led State's scoring.

HOG PROCESSING TAX
CONTINUES DOLLAR RATE
 Continuation until Feb. 1 of the processing tax on live hogs at \$1 per hundred-weight, was announced by the Agricultural Adjustment Administration. Under the original regulations, the tax was to have been increased to \$1.50 per hundred-weight at midnight Dec. 31.

Continuance of the one dollar rate of the tax was made partly in consideration of the continued large slaughter of hogs. The findings of the secretary indicated that the payment of the processing tax at an increased rate, as provided in the original schedule, would tend to result in the accumulation of surplus stocks and depression of the farm price of hogs.

CAUGHT FOX IN BARE HANDS

MIDDLEBORO, Mass. (UP)—Donald Gray doesn't use a trap or a gun when he captures a fox. He uses his hands. Gray was riding when he saw the fox cross in front of the automobile. He got out of the car, chased the animal, overtook it and caught it with his hands. Gray later sold the skin for \$5.

SWALLOWED AUTO KEY

OAKLAND, Cal. (UP)—All "keyed up" but no way to go was the situation in which William Dahey found himself after he had swallowed his automobile ignition key while driving to work. Dahey told physicians he was subject to fainting spells, and that he sometimes forestalled the attack by placing a cold key in his mouth.

COOKING with GAS

is Indiana's most FLEXIBLE way

..... There are many fuels available for cooking ... and many women achieve fine results even with old-fashioned methods ... but ... only after years of "trial-and-error." No fuel is so exactly controlled as GAS! Perfect results are had with the Gas Range on first "trial" without "error." Here is cooking flexibility at its perfection. Any degree of heat, from a simmering gleam to intense heat at instant turn-of-the-valve. Oven heat is regulated to the exact temperature called for in the cook-book. Broiling flame is set precisely right to assure perfect results. GAS is positively the most flexible cooking method in Indiana. Quickest, most dependable and economical, too! COOK WITH GAS ... for SURE RESULTS!

Widest Selection of Style and Beauty in GAS RANGE design

Never before in history has the Gas Range been offered in such a wide selection of style and beauty. Color, size, style, and price of the GAS Range now made to suit every kitchen and every purse.

Gas Cooking is

- 1 QUICK
- 2 ECONOMICAL

Round Rings Oval Holes

D—

Did you cuss when you that the installation of expensive and guaranteed did not cure your loss of power?

The Cause
Thousands of strokes of the up and down the cylinder and road dust and other abrasives into the cylinders with the tire, gradually wear down the cylinder wall. There is no ring made that will fit a shaped hole and if your engine has been run at all that is what will have.

The Cure
REGIND the cylinders. Head machine, made just work, is the doctor.

The money you are now paying for expensive gas and oil will soon pay the regind bill.
